

SUPAVOLT

EXTENDED LIFE & POWER

Product Optimized Title Place Holder 33px

SKU: Trade 09

- Ca-ca (calcium) alloyed strong plates
- High starting power under all weather conditions
- Maintenance-free design throughout its service life
- Long life and resistance to heavy duty conditions
- Design suitable for every brand and model with international norms and dimensions

Capacity	95 Ah
CCA	750 A
Guarantee	3 Years
Hold Down	B13
Height	190mm
Width	175mm
Length	353 mm
Weight	21.99Kg

Battery Technology

Which Battery Technology is Right for Your Vehicle

A standard flooded battery is designed to supply power to the starter and ignition system to start the engine. It also supplies extra power when the vehicle's electrical load exceeds the supply from the charging system. It provides power to electrical systems such as the clock and computer systems when the vehicle isn't running. And it evens out voltage spikes and prevents damage to other parts of the electrical system. In a standard vehicle, the Starting, Lighting, Ignition (SLI) battery is kept at a high state of charge (SOC), so it doesn't require deep-cycling capabilities. Most batteries today are standard flooded batteries.

Standard Flooded Battery Benefits

- Reliable starting power
- Basic charge acceptance
- Suitable for all climates
- Lowest-cost option

Standard Flooded Battery Disadvantages

- Limited ability to power large accessory loads
- Limited cycling capability
- Shorter life compared to other technologies

AGM or Absorbent Glass Mat is an advanced lead-acid battery that provides superior power to support the higher electrical demands of today's vehicles and start-stop applications.

AGM batteries are extremely resistant to vibration, are totally sealed, nonspillable and maintenance-free. AGM offers better cycling performance, minimal gassing and acid leakage when compared with conventional lead-acid batteries.

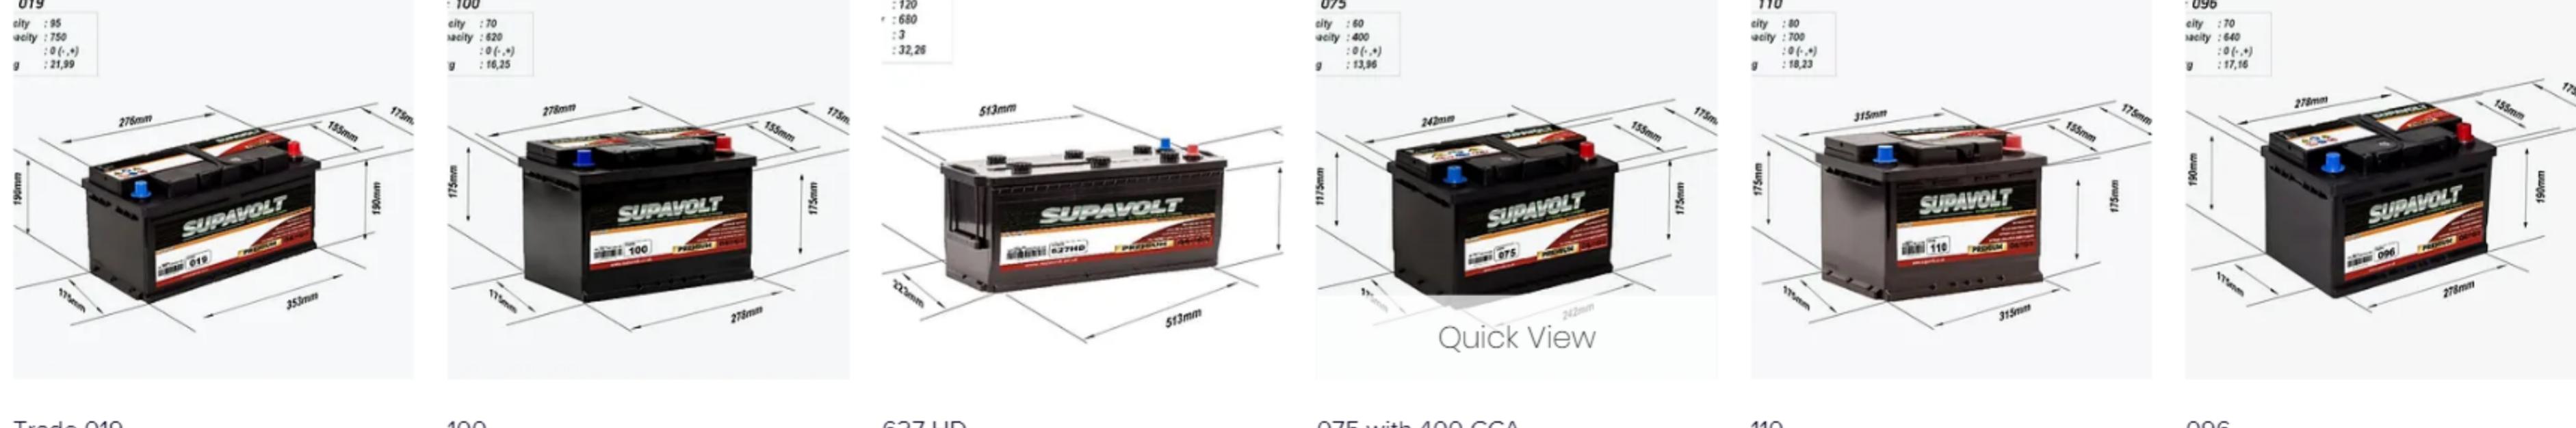

The end result of all of the features of AGM technology is superior life performance.

AGM Battery Benefits

- Up to 2x longer life than standard flooded batteries
- Designed for harsh climates and demanding conditions
- Handles high electrical loads
- Quickly recharges and extends cycle life
- Ideal for start-stop applications
- Vibration resistance
- Nonspillable and maintenance-free
- Greater mounting flexibility

AGM Battery Disadvantages

- Higher initial investment

ABOUT US

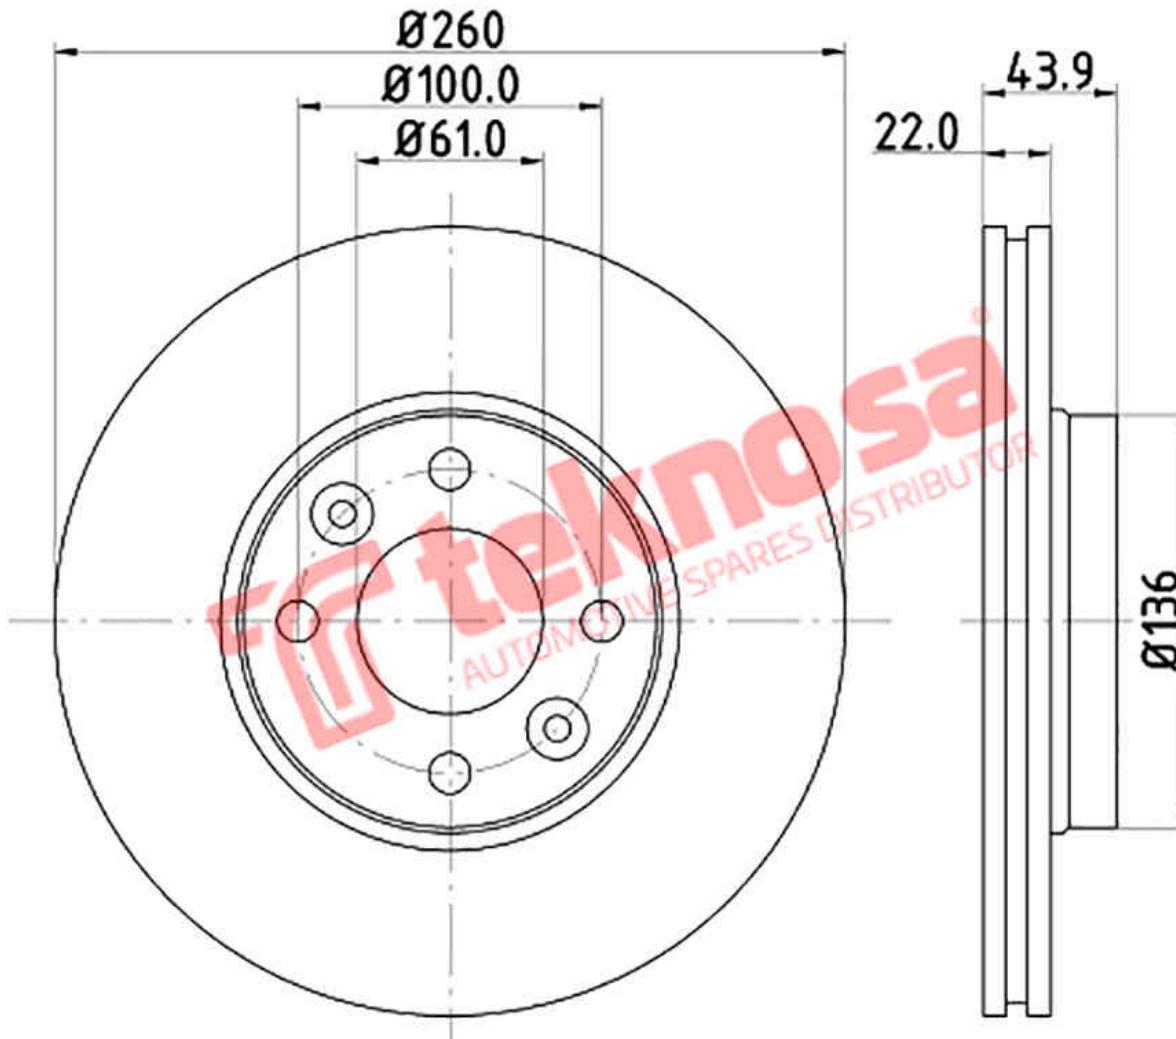

Supavolt Energy Solutions (Pty) Ltd. was founded and brought to the market in 2010 by Resul Eraydin after noticing the demand for premium quality batteries with a long-life and an economic price in the market.

Supervolt Batteries has grown with great strength from being a start-up company to being a leading brand in the automotive battery space in Southern Africa with double-digit growth each year.

We have now decided to expand and leave our footprint in Europe and Asia delivering good quality batteries to these markets. We are a knowledge-based company, importing and distributing all lead acid batteries and other battery technologies that is in demand, which fit the standards and requirements of the OE replacement standards in Europe.

MISSION

We highly value integrity and accountability.
We have made it our mission to provide our customers with high quality batteries at economic prices, great service, and customer care. We provide an excellent range of batteries to meet the needs of our customers.

OUR COMPANY

While the automotive industry is growing, bringing innovations and extending its model range rapidly, Teknosa started its operation to supply quality steering and suspension parts to South African market in 2008. Beginning with a simple plan to supply steering and suspension parts to the South African automotive industry,

Teknosa has continued to grow due to high demand for our quality components and our ability to form strong relationships with our customers

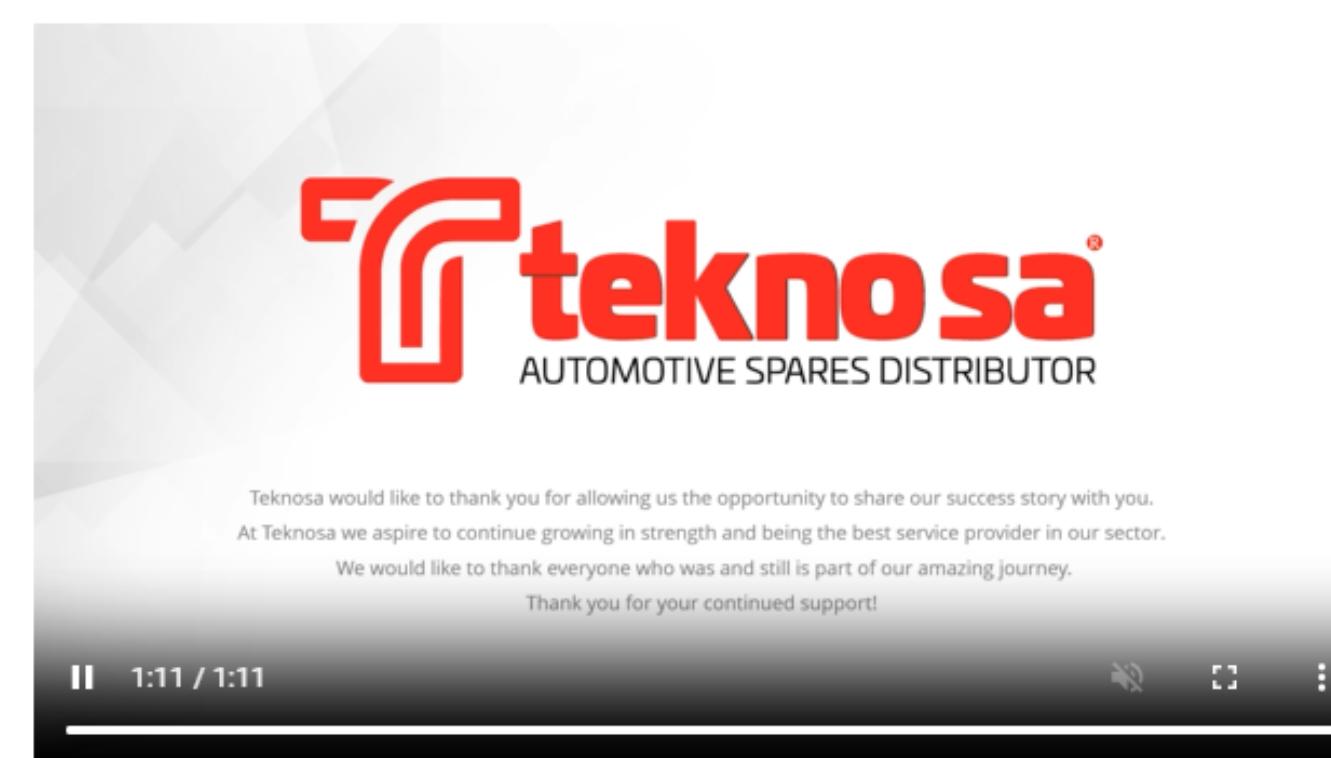

The company's biggest objective was to supply quality products at a competitive price with great efficiency. We live the happiness of achieving our goals. To align our range and availability with rapidly growing vehicle park we are partnered with leading manufacturers worldwide with Turkey being main source of our products.

Our Mission

To meet customer demands and expectations at the highest level by continuously improving our product and service quality.

Our Vision As a South African Company together with our size, range, capacity, quality and service, we strive to become the number one supplier in our area of expertise in the world. We will achieve our vision through our commitment to strategic growth, quality products, and continuous improvement. Teknosa's corporate vision expresses the collective aspirations of the people who work here. It unites us and directs our efforts.

Our Goal We aim to constantly increase the value of our company by increasing profitability and decreasing costs. We want to participate in successfully shaping the future of our customers, business partners and employees with our products and services.
